Applicants make reference to a Figure 7 in the changes to the specification, however, there is no Figure 7 present, only Figures 7A and 7B. The examiner suggests that applicants change the reference in the specification to say, "Figures 7A and 7B illustrate the morphological change of the brazing material during brazing." This then reflects that only Figures 7A and 7B are present as shown in the Figures provided. See Figure 6, wherein Figure 6, 6A and 6B are all provided which is not the case with Figures 7A and 7B wherein no separate Figure 7 is provided.
